

# Aero Floor Mounts

## Mobile 1450

The AERO MOBILE 1450 offers instant portability of your plasma display with complete safety. A wide track tubular steel base and 4" swivel casters enable fast, easy movement from room-to-room. The plasma display mounts onto a sturdy 63 $\frac{3}{8}$ " high extruded aluminum column. Display can be raised and lowered over a 30" range in 2" increments. Standard height setting places center of display image approximately 56 $\frac{3}{4}$ " off the floor. Display can be mounted either horizontally or vertically.

Optional base shelf and adjustable column shelves provide for VCR, DVD player, amplifier and related equipment.

## Mobile 2000

The AERO MOBILE 2000 is identical to the MOBILE 1450, except it is taller. The extruded aluminum column is 85 $\frac{1}{8}$ " high. Display can be raised and lowered over a 58" range in 2" increments. Standard height setting places center of display image approximately 78 $\frac{3}{4}$ " off the floor. Display can be mounted either horizontally or vertically.

Optional base shelf and adjustable column shelves provide for VCR, DVD player, amplifier and related equipment.

### Features for both MOBILE 1450 and MOBILE 2000:

- Maximum capacity 220 lbs.
- Handles displays up to 63" diagonal.
- Column has built-in cable management system
- Matt black powdercoat finish.
