

Ultimate Folding Screen

The World's Most Precisely Manufactured Folding Screen.

NEW

Draper is proud to introduce the new standard in portable folding screens. The Ultimate Folding Screen (shown at right with Heavy-Duty Legs) is the first screen manufactured with 100% CNC (Computer Numerical Controlled) components and assembly. The tubing is CNC machined, surfaces and borders are CNC cut; even rivet and snap holes are CNC placed. **No competitive product meets this standard—and we did not stop there.**

Our new Lock & Load latch (patent pending) is designed for ease of operation and maximum life. Lock & Load mortise latches bite down when the surface is attached, making the frame extremely rigid. Latch parts are internal for better protection and they completely fill the tube for superior strength. The resilient latch retention spring is captured and constantly flexed so that it cannot be dislodged. These advancements translate into the most user friendly and incredibly durable hinge locking mechanism available. Couple these advantages with clear anodized 1.25" x .070 wall aluminum tubing and you've got the precision and stability that allows Draper to offer the Ultimate Folding Screen in sizes through 12' x 16'.

Viewing Surfaces

The Ultimate Folding Screen is available with flexible matt white for front projection or Cineflex vinyl for rear projection. For maximum flexibility, choose both! All surfaces—front and rear—have square corners. Borders are electronically welded using a new PVC material that provides straighter, cleaner edges. Ultimate Folding Screen Standard viewing surfaces may be interchanged freely with Cinefold surfaces and have 2¾" of black masking border. Ultimate Folding Screen Euro viewing surfaces have 4" of black masking border.

Features and Options

Standard Legs support the Ultimate Folding Screen in a vertical position. The screen may also be tilted for keystone elimination using the Heavy-Duty Legs which offer extra stability with an adjustable gusset. The Ultimate Folding Screen comes packed in Draper's heavy-duty, molded polyethylene wheeled carrying case.

Ultimate Folding Dress Kits

For a Professional Appearance.

Make your presentation one to remember. Create a professional, theatre-like appearance by draping your Ultimate Folding Screen with an eye-catching velour Dress Kit. Drapery curtains surround the viewing surface, pulling the audience's focus to your presentation on the screen.

All Ultimate Folding Screen Dress Kit fabrics are flame proofed, meeting fire safety codes. In addition to framing your presentation, the velour curtains will hide projection equipment, shield projector light from the audience, and help eliminate ambient light in the projection area.

Features and Options

A complete Dress Kit includes 46" skirt, 12" valance, and two 32" side drapes, all in rich velour. 100% CNC (Computer Numerical Controlled) valance bar and drapery bars fit snugly into the top of the Ultimate Folding Screen frame—no tools needed. The viewing surface is fitted with snaps to accept the skirt. A carrying case is optional for a standard Ultimate Folding Screen Dress Kit.

Fabric

20 oz. Velour made from 100% cotton is offered in black (standard), rich navy (optional) or a variety of custom colors. Details available on request.

Recommended Accessories

Heavy-Duty Legs, for extra stability (shown at right). A polyethylene carrying case is recommended.

Dress Kit Fittings

The valance bar assembles to the top of the Ultimate Folding Screen frame. Two drapery side bars slide easily into each end of the valance bar and lock into place with a ball detent (shown at right).
